

ThreeBond

PRODUCT APPLICATION SPOTLIGHT

Materials with UL Ratings

These materials excel in protecting your components from further damage in the presence of flames.

SEALANTS

ADHESIVES

STRUCTURAL

TB1207B

- HB
- One-part moisture cure silicone sealant
- Non-sag (stays in place before cure)
- Good elasticity, temperature resistance, and chemical resistance

TB1225B

- V0
- One-part moisture cure silicone sealant
- Good elasticity, temperature resistance, and chemical resistance

TB1230

- V1 & V0
- Two-component silicone potting agent
- Excellent resistance to heat, cold, shock, water, moisture
- Good electrical insulation
- Good thermal conductivity

TB1530C

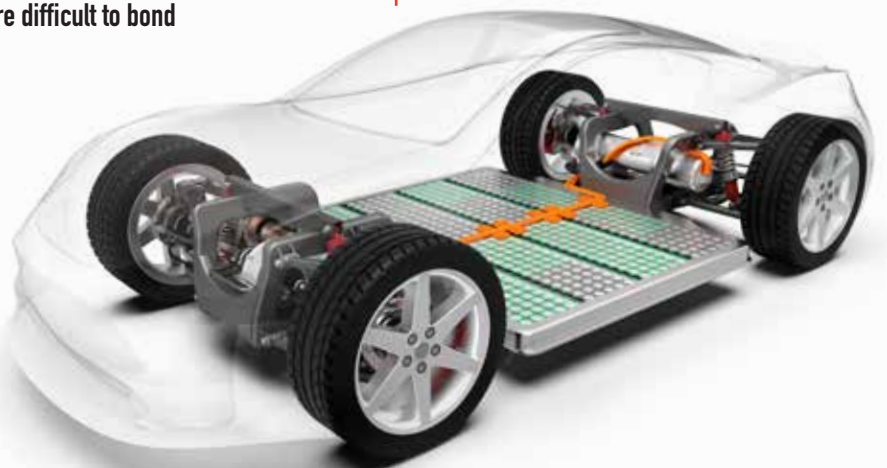

- HB
- One-component moisture cure adhesive sealant
- Safe around electronics and plastics
- Excellent adhesion to substrates that are difficult to bond

TB1537 Series (A, B, D)

- V0
- One-part moisture cure adhesive sealant
- Safe around electronics and plastics
- Low cure shrinkage
- Excellent adhesion to substrates that are difficult to bond

TB2045B / 2145B*

- V0 Equivalent
- Two-part epoxy
- Excellent thermal conductivity
- Good electrical insulation
- High bonding strength

Trusted worldwide, ThreeBond meets you where you are.
